

**Heart Diseases**  
*Diagnostic markers derived from stress-tests & resting variables*

**Heart Disease Status**

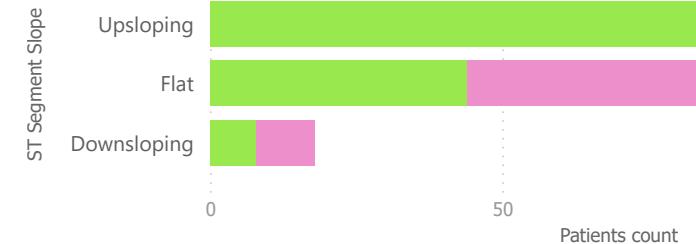

**Max Heart Rate vs ST Depression during exercise stress**

Likelihood Ratio test, p-value < 0.001 \*\*\*

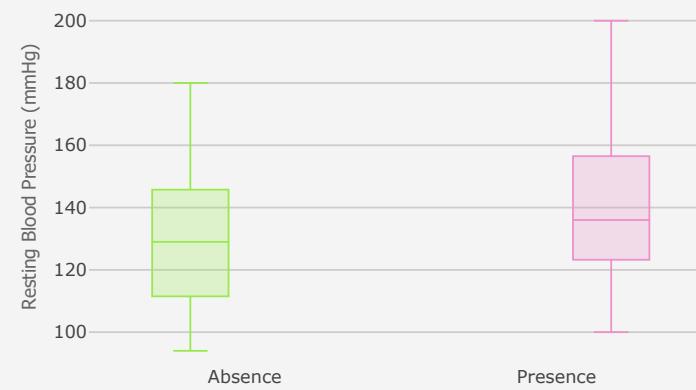

**Counts of ST Segment Slope during exercise stress**

Chi-square test, p-value < 0.001 \*\*\*

**Blood Pressure distribution at rest**

t-test, p-value = 0.1109 ns

**Cholesterol levels at rest**

t-test, p-value = 0.0166 \*
